- Maturity range of 7 -20 years
- Accounts typically hold 15 25 positions with average annual turnover of <20%

INVESTMENT PHILOSOPHY & PROCESS

INVESTMENT GUIDELINES

| Maturity Range | 7 – 20 Years | |
|----------------------------|--|--|
| Duration Range | 6 – 8 Years | |
| Credit Quality | Investment Grade | |
| Geographic Diversification | Portfolios are national and will be geographically diversified | |
| Issuer Diversification | 5% single position target; 8% exposure to any one obligor | |
| Benchmark | Bloomberg 15 Year Municipal | |

ACTIVE PORTFOLIO REVIEW:

- Impact scores are tracked and compared with other buy candidates.
- Improving impact scores, spread tightening, credit improvement, and price appreciation are likely indicators of thesis validation.
- Relative value of bond holdings vs. comparable alternatives is constantly evaluated.
- Monitor and adjust duration and other portfolio characteristics as needed.

SELL DISCIPLINE:

- Improving impact scores
- Unfavorable relative value characteristics
- Unexpected credit deterioration

MATURITY PROFILE

¹Composite data and characteristics as of 9.30.24

Sources: Appleton Partners, Inc.

²Credit Profile: AAA includes cash and pre-refunded bonds. Credit rating for each security is determined by taking the lower rating of S&P and Moody's.

The composites used to calculate strategy characteristics ("Characteristic Composites") are subsets of the account groups used to calculate strategy performance ("Performance Composites"). Characteristic Composites excludes any account in the Performance Composite where cash exceeds 10% of the portfolio. Therefore, Characteristic Composites can be a smaller subset of accounts than Performance Composites. Inclusion of the additional accounts in the Characteristic Composites would likely alter the characteristics displayed above by the excess cash. Please contact us if you would like to see characteristics of Appleton's Performance Composites.

Yield is a moment-in-time statistical metric for fixed income securities that helps investors determine the value of a security, portfolio or composite. YTW and YTM assume that the investor holds the bond to its call date or maturity. YTW and YTM are two of many factors that ultimately determine the rate of return of a bond or portfolio. Other factors include re-investment rate, whether the bond is held to maturity and whether the entity actually makes the coupon payments. Current Yield strictly measures a bond or portfolio's cash flows and has no bearing on performance. For calculation purposes, Appleton uses an assumed cash yield which is updated on the last day of each quarter to match that of the Schwab Municipal Money Fund.
